- 88% of all carbon atoms in end products come from fossil resources
- 4500 M tons fossil oil (210 M vegetable oil) production p.a.

An orangutan is shown in the foreground, looking towards the left. The background is a landscape where a forest has been cleared, and rows of young green plants are being grown in the soil. The scene is set during sunset or sunrise, with a warm, orange glow in the sky and silhouettes of trees in the distance.

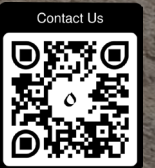

# Sugar fermented oils cause deforestation
