Returning matters

	1	2	3	4	5	19	20	After 20 cycles
Cardboard box								3,0 kg of trash 4,4 kg of CO ₂
CO ₂	220 g	220 g	220 g	220 g	220 g	220 g	220 g	
RePack M								0,1 kg of trash 0,9 kg of CO ₂
CO ₂	248 g	36 g	36 g	36 g	36 g	36 g	36 g	

- 80% CO₂

Manufacturing and waste treatment of one RePack M (118 g) causes approx. 211 g CO₂, but every reuse only 36 g.
Manufacturing and waste treatment of one cardboard box (150 g) causes approx. 220 g CO₂ – over and over again.

Customers love it

Much nicer to open it up like a parcel rather than to tear a plastic bag.

@addnature RePacker

It was great! Never heard before. It was easy, even for me! :)

@alpknitwear RePacker

Green. I didn't know it was that easy.

@mudjeans RePacker

Honestly, RePack is a fantastic idea and it was really effortless to return the pack. Good job!
