# Roundtable „Daten, Digitalisierung & Nachhaltigkeit“

## Sustainability Circle, 15. Februar 2023

IF YOU WANT TO  
SAVE THE  
WORLD...

... YOU NEED TO THROW A  
BETTER PARTY THAN THE  
ONES DESTROYING IT!

Thanks to Pascal Schwarz (Elobau)

# Ihre Gastgeber heute

Senior Business Solution Manager  
Sustainability Innovation

**Dr. Moritz Gomm**

# Regeln für den Online Roundtable

- Während dem Vortrag bitte **Mikrofone und Kameras aus**.
- **Fragen** für den späteren Austausch bitte im Chat notieren.
- **Verständnisfragen** bitte direkt über Mikrofon stellen.
- Nur die Vorträge werden aufgezeichnet, die Diskussionen im Anschluss nicht.
- Alle **Folien** erhalten Sie im Nachgang.

*Aufnahme  
drücken!*

# Agenda (9-12 Uhr)

**Impuls (30 Min.)**

**Impuls (30 Min.)**

**Impuls (10 Min.)**

**Pause**

**Breakout-Sessions:**

- 1. How to successfully run Data & AI projects for sustainability?**   
(with Dan, Zühlke and Martina)
- 2. Wie komme ich an meine ESG-Daten und wie transparent sollte man sein?**  
(mit Pascal, elobau, und Chris)
- 3. Wie lässt sich Energieflexibilisierung durch KI für Unternehmen nutzen?**  
(mit Dyke, Flexality, und Georg)

**Dan Klein & Steven Steer (Zühlke)**

Head of Data & AI, Principal Data Consultant

**Pascal Schwarz (elobau)**

Referent Nachhaltigkeit & Energiemanagement

**Dyke Wilke (Flexality)**

Founder & CEO

# Unsere neuen Gäste

# Endress+Hauser

People for Process Automation

Messgeräte, Dienstleistungen und Lösungen  
für die industrielle Verfahrenstechnik

## Bzgl. Sustainability

- Hauptmotivation für das Thema
- Organisatorische Verankerung

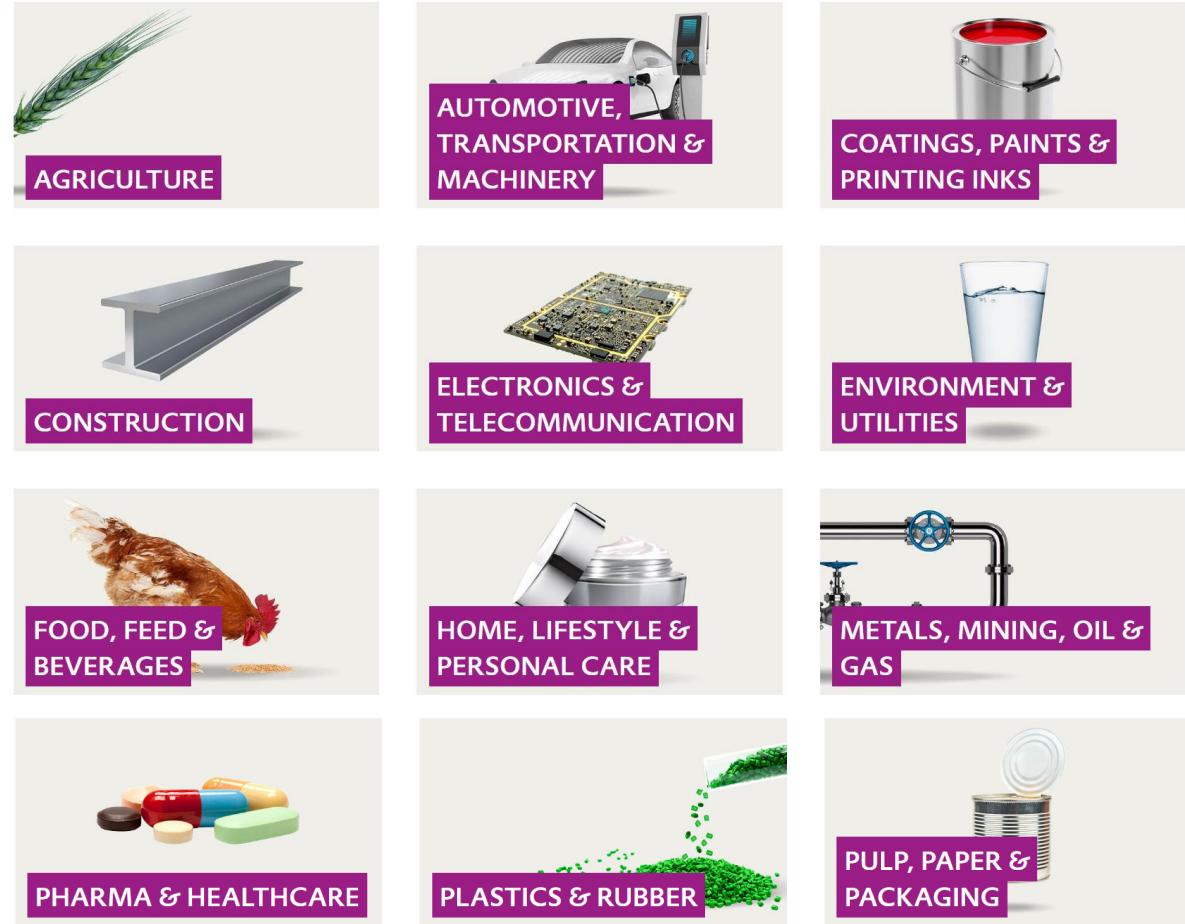

Endress+Hauser (2022)  
Umsatz > 3,3 Mrd. €  
Mitarbeiter > 15.000

## Spezialchemie & Hochleistungsmaterialien

### Bzgl. Sustainability

- Hauptmotivation für das Thema
- Organisatorische Verankerung

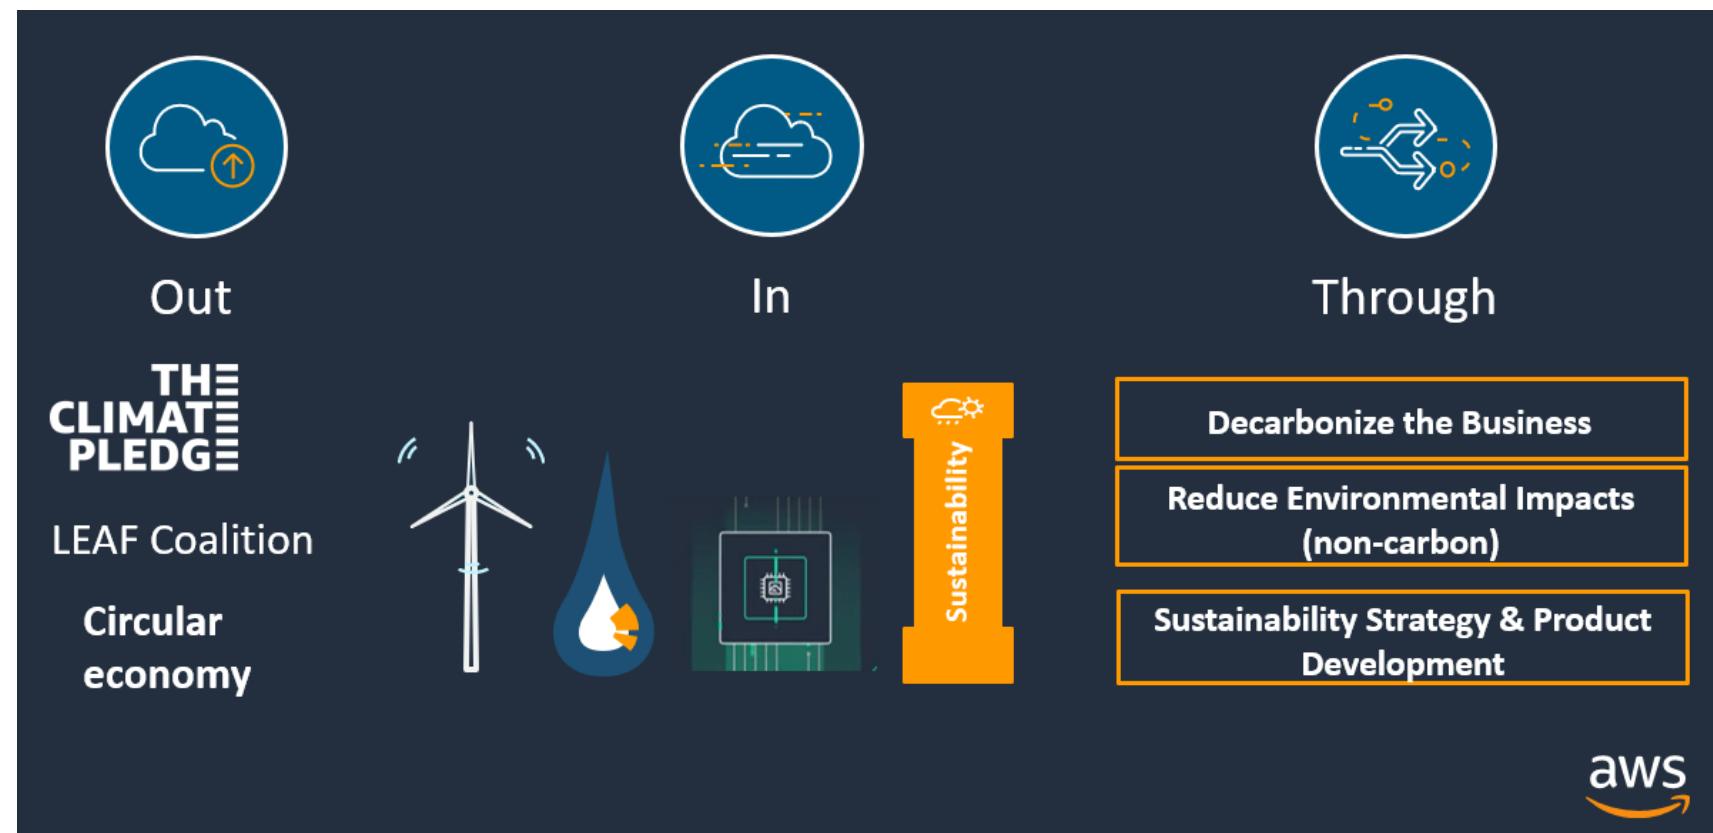

AWS (2021)  
Umsatz > 62 Mrd. \$  
Mitarbeiter > 45.000

## Cloud Computing Services

### Bzgl. Sustainability

- Hauptmotivation für das Thema
- Organisatorische Verankerung

Nachhaltigkeit ist einer von vier wesentlichen Eckpfeilern unserer Strategie:

*„Es ist unser Anspruch, diesen Wandel aktiv zu gestalten, zu begleiten und die Chancen dieser Transformation für uns und unsere Kunden zu ergreifen.“*

## Bzgl. Sustainability

- Hauptmotivation für das Thema
- Was wir konkret tun
- Organisatorische Verankerung

**Commerzbank (2021)**  
EBIT > 1,183 Mrd. €  
Mitarbeiter > 40.000  
Bilanzsumme > 470 Mrd. €  
Standorte in 40 Ländern

# Impuls-Vorträge

# Data, Digitalization and Sustainability

Dan Klein & Dr. Steven Steer

15<sup>th</sup> February 2023

# Global challenges devolved to the local level

Responsible Investment (UNPRI) and Government Regulations (UNEP)

# Report ESG and then create systemic change

Data and Digital underpin the opportunities to create a better world

## Private Companies

- ESG Investing
- ESG Reporting
- New business models?
- New services?

## Governments

- SDG Policies
- SDG Reporting
- Sector specific market and system changes
  - Energy markets
  - Health markets
  - Food/Agriculture markets
  - Natural resource markets (water, extractives)
  - Labour markets

# Kigali: Measuring crop growth, daily by field

An extendable model for Africa on hyper-localized food crops, from daily satellite images

## Approach

The most basic task of searching through, visualising, and sharing data has become a challenge. Our service offers an imagery catalogue that makes it easy for organisations to make all of the geospatial imagery they use available in one place, and easily shareable across multiple teams.

A pipeline [right] producing a SAVI (Soil Adjusted Vegetation Index) for a custom defined region

Using the Earth Observation Service it was a simple matter to implement the SAVI using data drawn from the Platform's Data Service. Working from the left each block of the pipeline performs operations and its outputs are then passed on to the next element to be processed. The modular approach allows for the creation of powerful real-time processing of satellite data.

The SAVI index is a transformation technique that minimises soil brightness influences from spectral vegetation indices involving red and near-infrared (NIR) wavelengths. The transformation was found to nearly eliminate soil-induced variations in vegetation indices.

## In Use

The Global Platform delivers a direct feed to this data and other sources. Datasets currently available on the platform include:

- Landsat 4 + 5 Thematic Mapper,
- Landsat 7 Enhanced Thematic Mapper,
- Landsat Tri-Decadal,
- Landsat 8,
- Sentinel 2A and 2B.

The Task Team on Satellite Imagery and Geospatial Data have produced a guide for National Statistical Offices considering using satellite imagery. The Task Team are now using the platform and Earth Observation Service to develop this work and produce re-usable resources for the global community.

## Get Involved...

<https://marketplace.officialstatistics.org/earth-observation>

- Rwandan National Statistics Office
- Able to identify each crop, likely yield and contribution to local economy
- Direct impact on Rwandan Government ability to measure SDG targets

## Commercial services ?

- Installation of additional water services
- Locations for inbound investment
- Services for local farmers to improve yields and sell crops

# An example from Dr. Wolfgang Dietl, Allianz

How do you improve risk evaluation & ESG for all bakeries in Germany?

Who publishes the data for...

- The definition of a “bakery” (Bundesregierung)
- The geolocation of each bakery ?
- Legal structures and governance for each bakery ?
- Daily electricity (renewables/non-renewables) & water used at each bakery ?
- The daily satellite heatmap of each bakery (Airbus)
- Staff employed at each bakery and conditions ?

# Lessons Learnt

Generating and consuming data at global scale requires a mindset shift

- National datasets must become 'presumed open' (anonymised and de-sensitized)
- Data & digital services rely on each other (Commercial and Governments)
- Be aware of proxies and assumptions in your models; it can destroy trust very quickly
- Share all your anonymous operational data with the market, using a scalable license model that can be used if value is found
- Combinations of datasets will create novel digital services and applications
- Real world sensors and process data is where the value is

# Energy services at the heart of UK sustainability

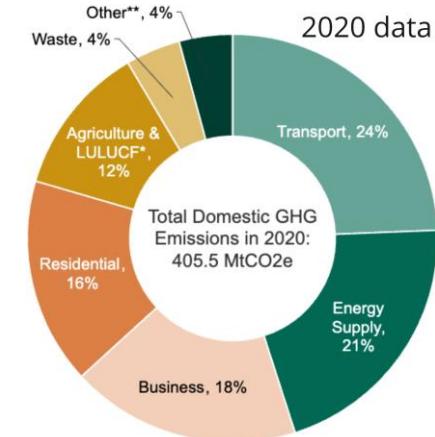

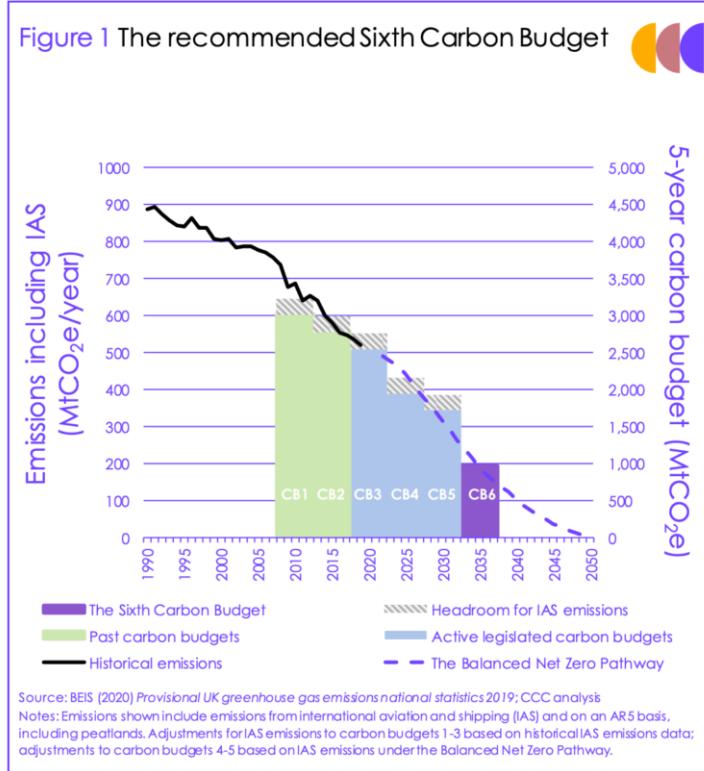

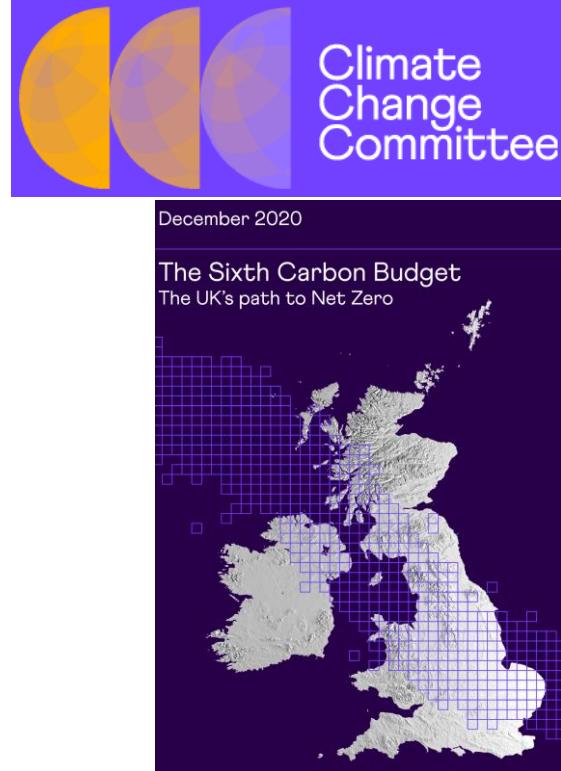

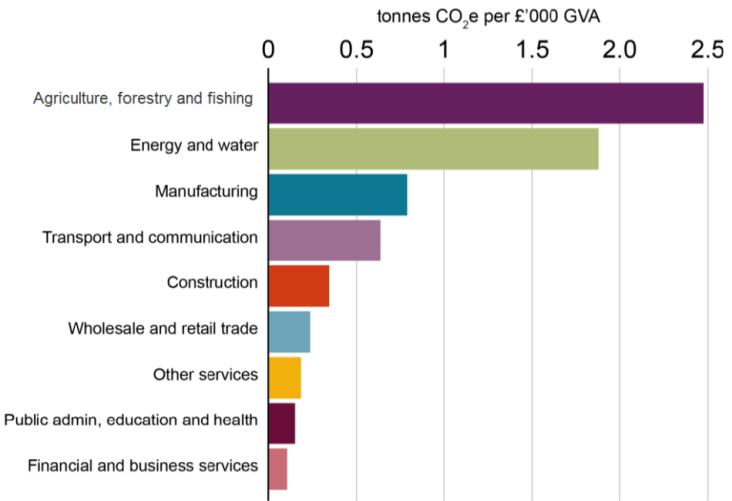

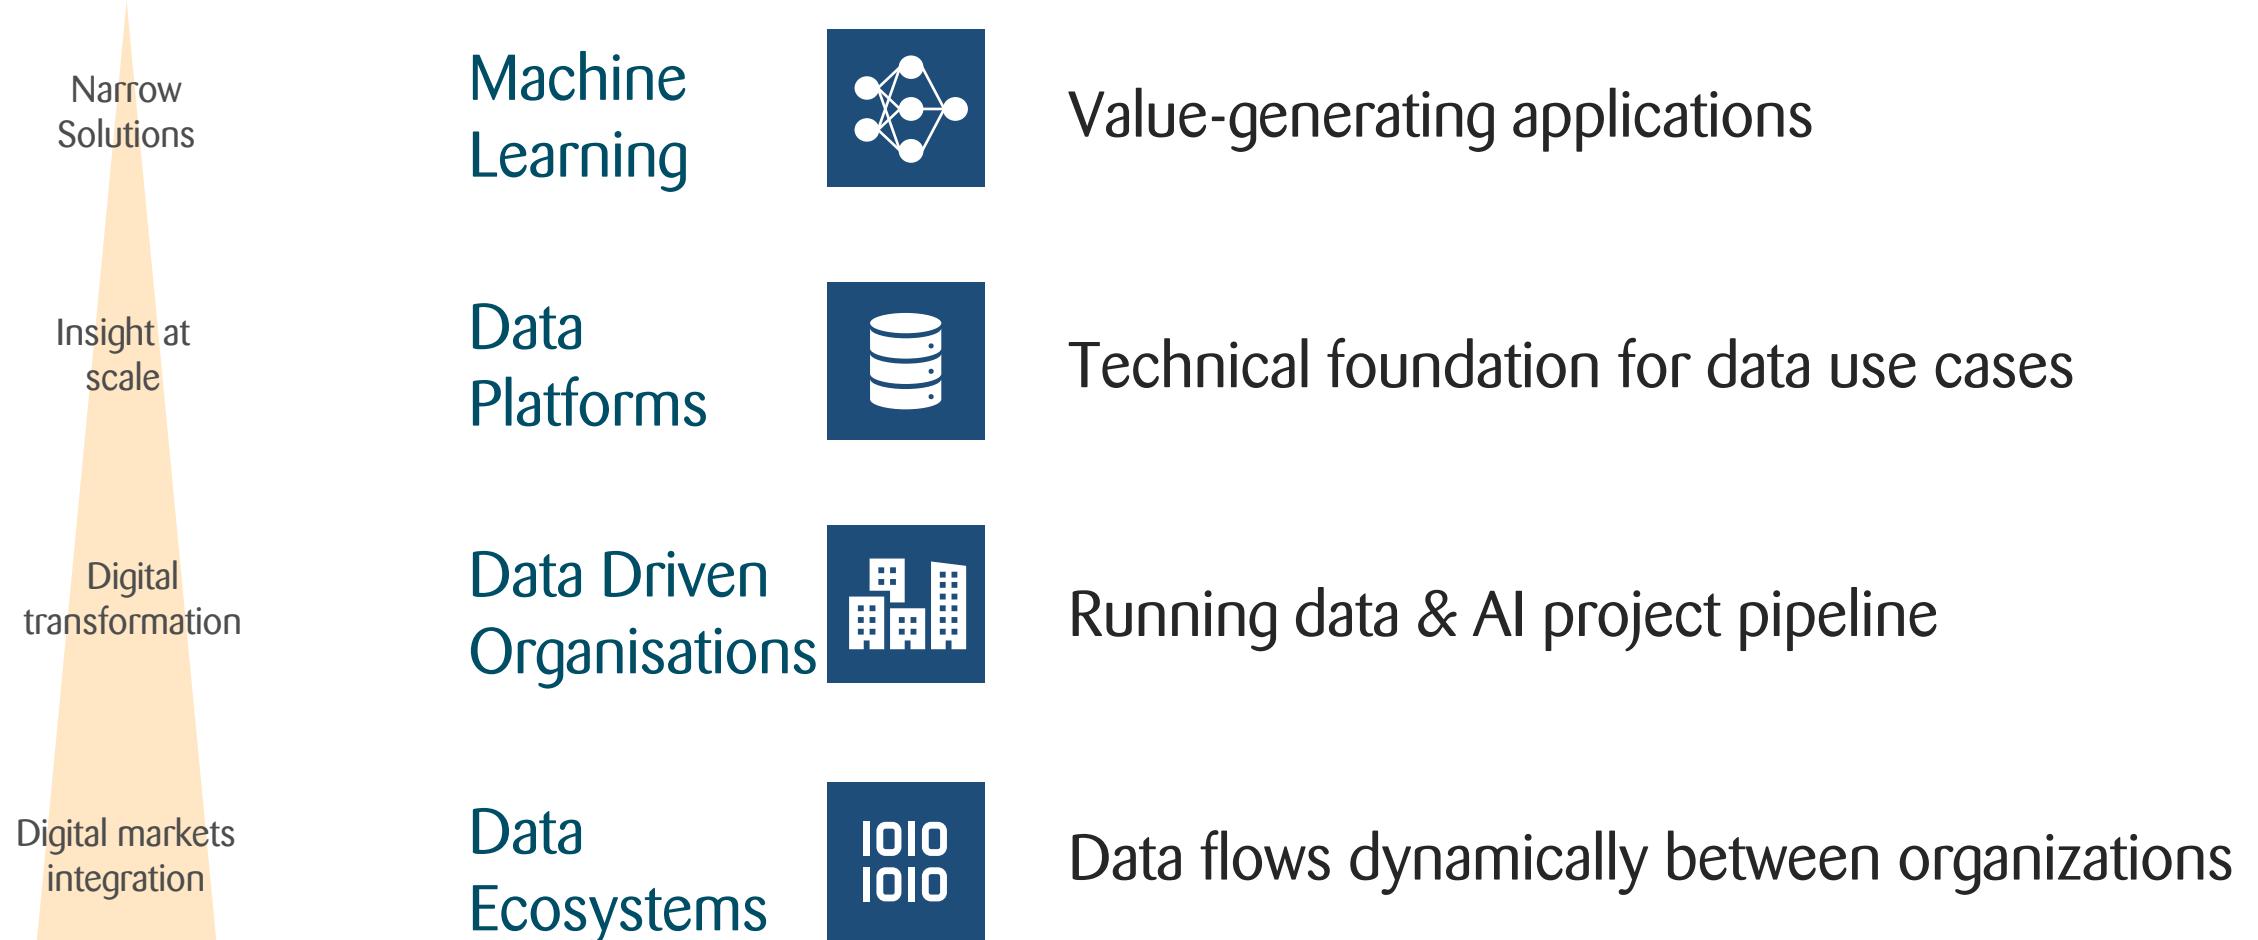

Figure 3: Tonnes of material used per £'000 of Gross Value Added by Sector<sup>32</sup>

# Zühlke's levels of projects in Data & AI

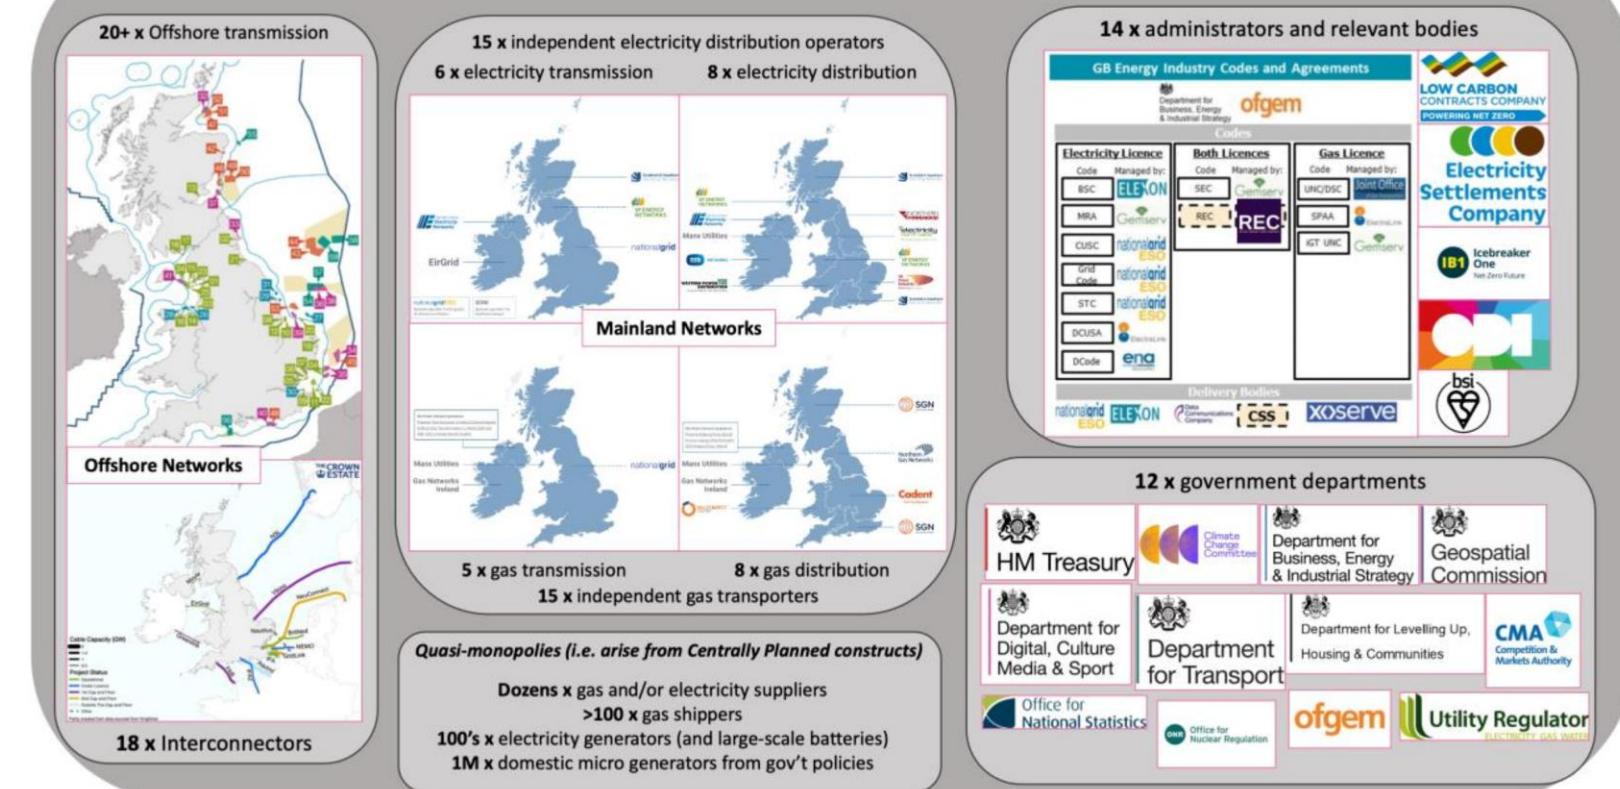

# A complex ecosystem – an extreme case

## One energy service for consumers

Dozens of organisations providing that one service

Today's energy system landscape of adjacent private monopolies & public silos

# UK Energy Regulation has taken significant steps

Office for Gas & Electricity Markets (Ofgem)

## The UK has new digital & data regulations

### Data Best Practice Principles

1. Identify the roles of stakeholders of Data Assets
2. Use common terms within Data Assets, Metadata and supporting information
3. Describe data accurately using industry standard Metadata
4. Enable potential Data Users to understand Data Assets by providing supporting information
5. Make Data Assets discoverable for potential Data Users
6. Learn and deliver to the needs of current and prospective Data Users
7. Ensure data quality maintenance and improvement is prioritised by Data User needs
8. Ensure Data Assets are interoperable with Data Assets from other data and digital services
9. Protect Data Assets and systems in accordance with Security, Privacy and Resilience best practice
10. Store, archive and provide access to Data Assets in ways that ensure sustained benefits
11. Treat all Data Assets, their associated Metadata and software scripts used to process Data Assets as Presumed Open

### Digitalisation Strategy and Action Plan (DSAP) Principles

1. Prioritise providing benefits to the stakeholders who pay for the Products and Services as well as benefits that are in the Public Interest
2. Ensure Products and Services work towards a defined vision
3. Take full advantage of opportunities to deliver benefits early and to iterate improvements to Products and Services
4. Make it easy for stakeholders to understand the Products and Services, the status of their delivery and how to access them
5. Ensure visibility about the nature and status of actions in the Digitalisation Action Plan
6. Ensure there is shared understanding of success and performance is measured
7. Coordinate with the wider ecosystem of Products and Services

3.19. The Licensee must treat all Data Assets, their associated Metadata and software scripts used to process Data Assets that it is the Data Custodian of as Presumed Open and these must be subjected to Open Data Triage.

3.20. The Licensee must treat information created during Open Data Triage as Open Data, except where this will result in a sensitivity listed in the Open Data Triage definition.

3.18. Where Single Provider Products or Services are or will be provided by the Licensee as part of the Products and Services included in their DSAP, the Licensee must ensure the Single Provider Product or Service is developed in a way that achieves Interoperability-By-Design throughout its end-to-end lifecycle, enabling the integration of the product or service with other Single Provider Product or Services, including those provided by other organisations.

**Summary: H.R.1770 — 115th Congress (2017–2018)** All Information (Except Text)

There is one summary for H.R.1770. Bill summaries are authored by CRS.

**Shown Here:**  
Introduced in House (03/29/2017)  
Open, Public, Electronic, and Necessary Government Data Act or the OPEN Government Data Act

This bill requires open government data assets made available by federal agencies (excluding the Government Accountability Office, the Federal Election Commission, and certain other government entities) to be published as machine-readable data. When not otherwise prohibited by law, and to the extent practicable, public data assets and nonpublic data assets maintained by the federal government must be available: (1) in open data formats developed by the agency or a standards organization, and (2) under open licenses with a legal guarantee that the data be available at no cost to the public who wish to reuse, copy, publishing, distributing, translating, reformatting, citing, or adapting.

If published government data assets are not available under an open license, the data must be considered part of the worldwide public domain. Agencies may engage with outside organizations and citizens to leverage public data assets for innovation in public and private sectors.

Agencies must: (1) make their enterprise data inventories available to the public on Data.gov, and (2) designate a point of contact to assist the public and respond to complaints about adherence to open data requirements. For privacy, security, confidentiality, or regulatory reasons, agencies may maintain a nonpublic portion of their inventories.

The General Services Administration must maintain a single public interface online as a point of entry dedicated to sharing open government data with the public.

The Office of Management and Budget must develop and maintain an online repository of rules, best practices, and schema standards to facilitate the adoption of open data practices.

HOME > OPEN DATA PLAN

**Open Data Plan**

The Foundations for Evidence-Based Policy Making Act of 2018 Strategy to improve government operations and evidence-based decision making.

The Evidence Act requires agencies to develop and maintain an open data plan.

The Open Data Plan shall be updated annually and made available on the Evidence Act's Open Data Plan requirement.

**Data Strategy**

The FERC FY22-26 Strategic Plan identifies new challenges and opportunities for shared data across the Commission. The Data Strategy will support data-driven decision-making following a data governance model.

FERC established and integrated its Data Strategy into the FERC collections program and ensuring an effective data management capabilities against our roadmap and rolling out data science training.

**FERC Data Governance Working Group**

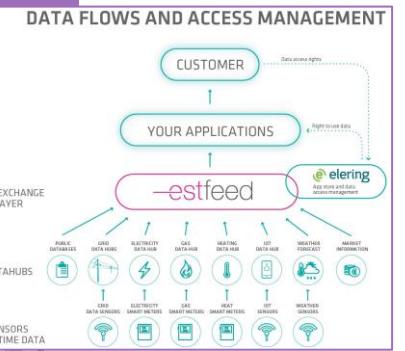

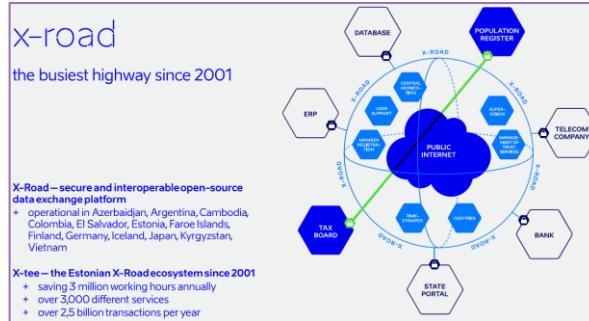

In August 2019, FERC established its Data Governance Working Group.

The Commission's Chief Data Officer and Chief Information Officer will lead the Data Governance Working Group.

**Data Governance Working Group Charter**

As of August 2019, FERC established its Agency Data Governance Working Group.

As noted in its charter, the scope of the DGWG's purview includes:

**Cabinet Office**

Japanese Search

**Society 5.0**

**What is Society 5.0?**

One definition: "A human-centered society that balances economic advancement with the resolution of social problems by a system that highly integrates cyberspace and physical space."

Society 5.0 was proposed in the 5th Science and Technology Basic Plan as a future society that Japan should aspire to. It follows the hunting society (Society 1.0), agricultural society (Society 2.0), industrial society (Society 3.0), and information society (Society 4.0).

Kunden zahlen fast eine Milliarde Euro  
für Strom, den sie gar nicht kriegen**

Erstellt: 16.12.2022, 11:58 Uhr

Von: [Lisa Mayerhofer](#)

**Entschädigung für nicht eingespeisten Strom auf Höchststand**

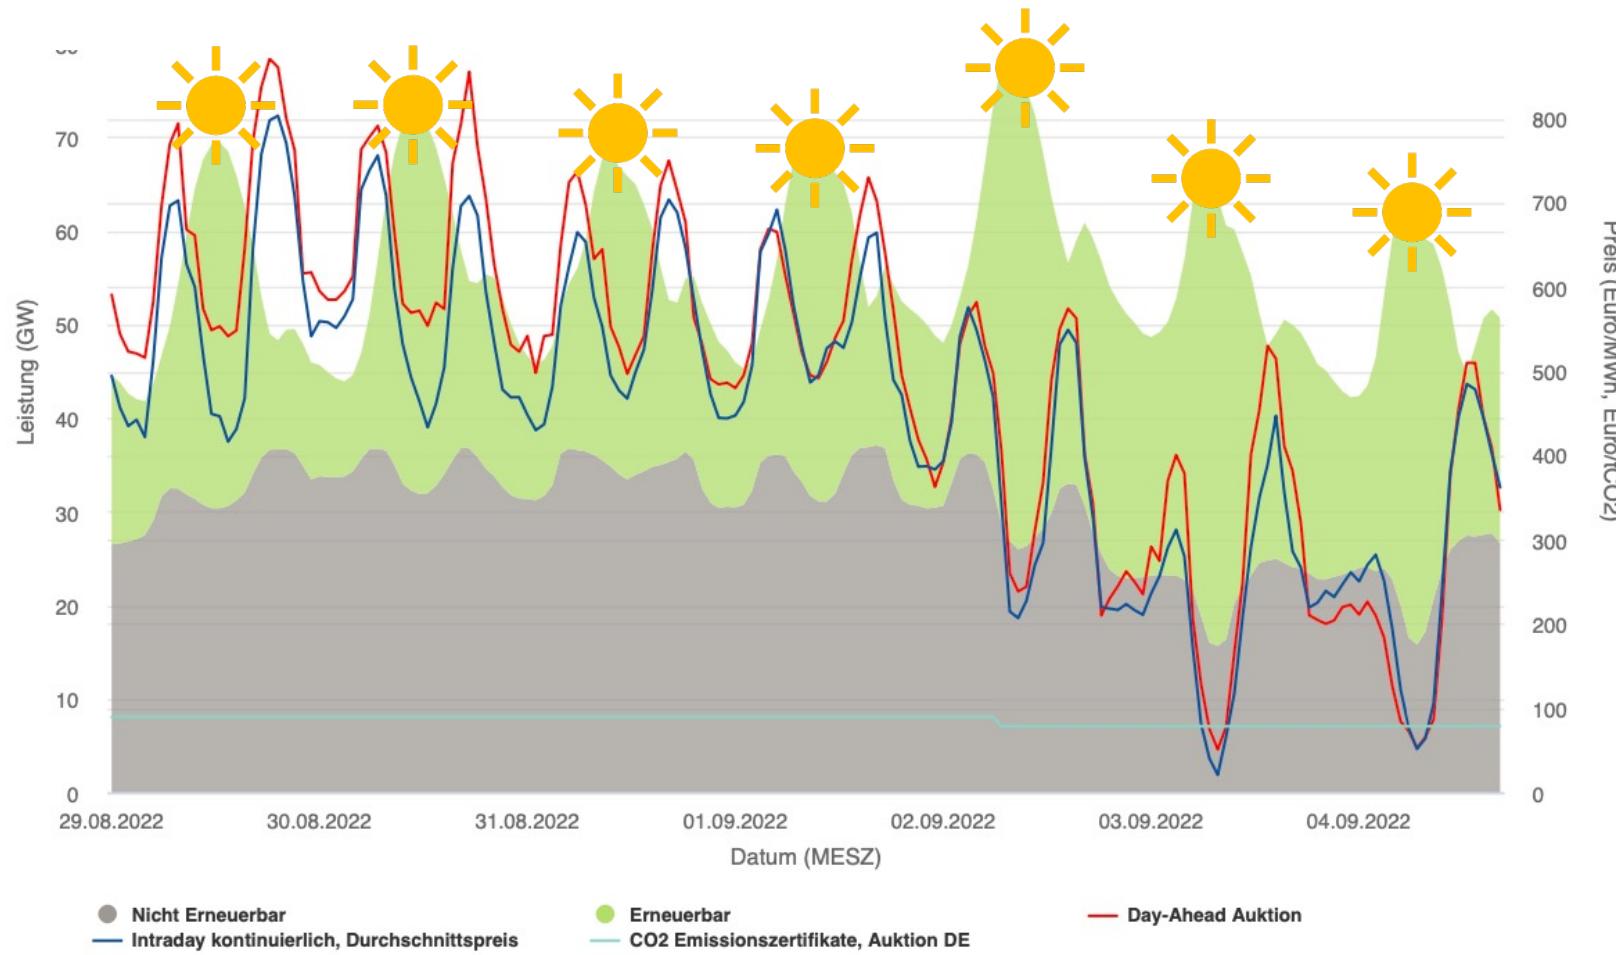

tagesschau.de • Lesedauer: 2 Min.

Stromnetz

**Stromproduzenten erhalten  
Entschädigungszahlungen in  
Rekordhöhe**

WELCHEN EINFLUSS HAT SOLARENERGIE?

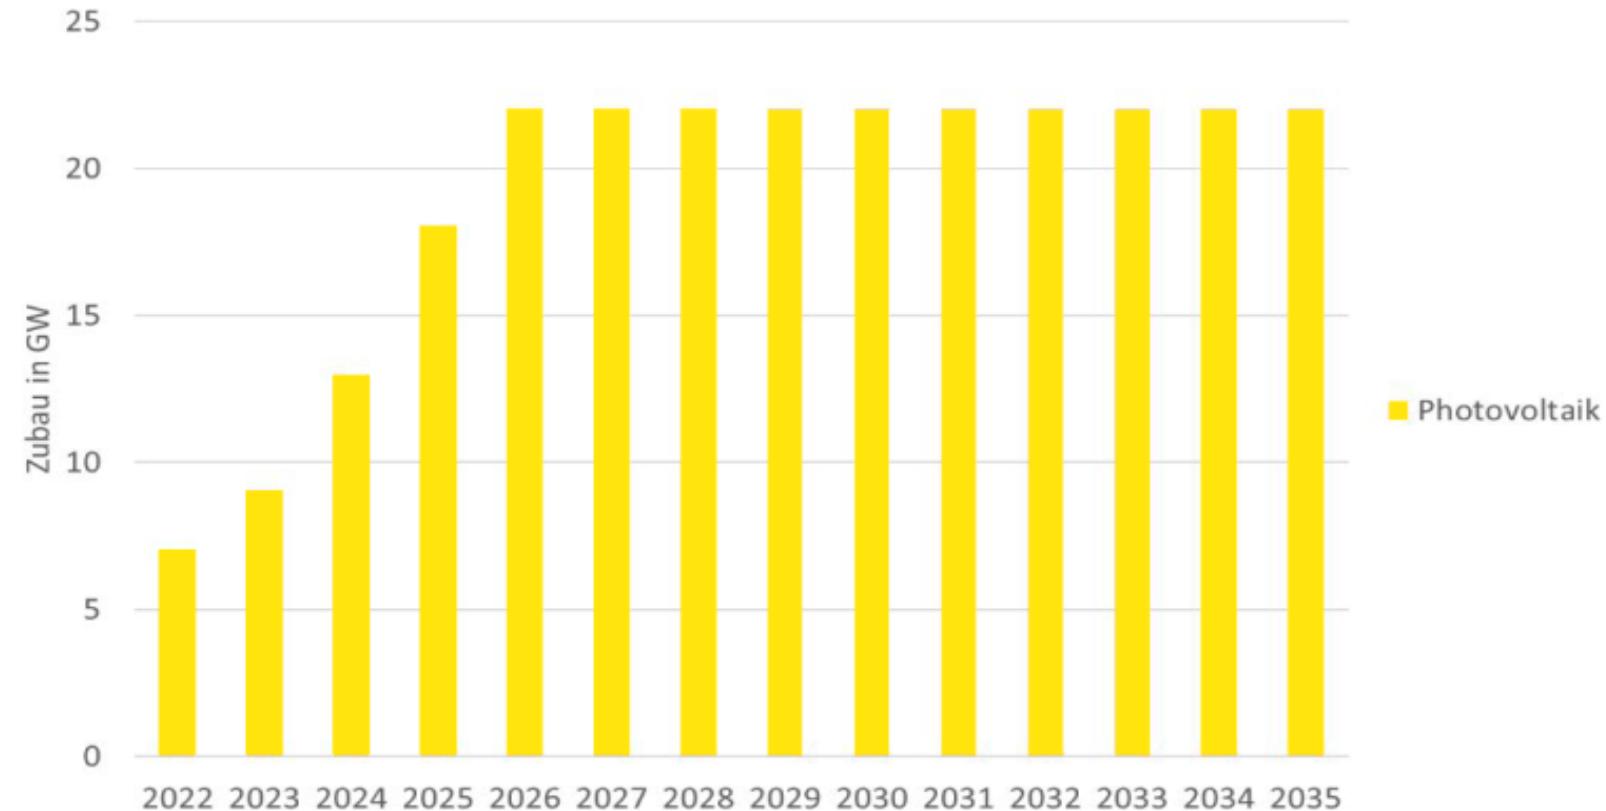

# Viel Sonne drückt den Preis

Energy-Charts.info; Datenquelle: 50 Hertz, Amprion, Tennet, TransnetBW, EEX, EPEX SPOT; Letztes Update: 04.01.2023, 14:08 MEZ

WIE SIEHT DAS IN DER ZUKUNFT AUS?

# Ausbaupfad Photovoltaik - 600 TWh in 2030

WAS SIND MÖGLICHE LÖSUNGEN FÜR DIE STEIGENDE VOLATILITÄT?

# Speicher lösen das Problem alleine nicht.

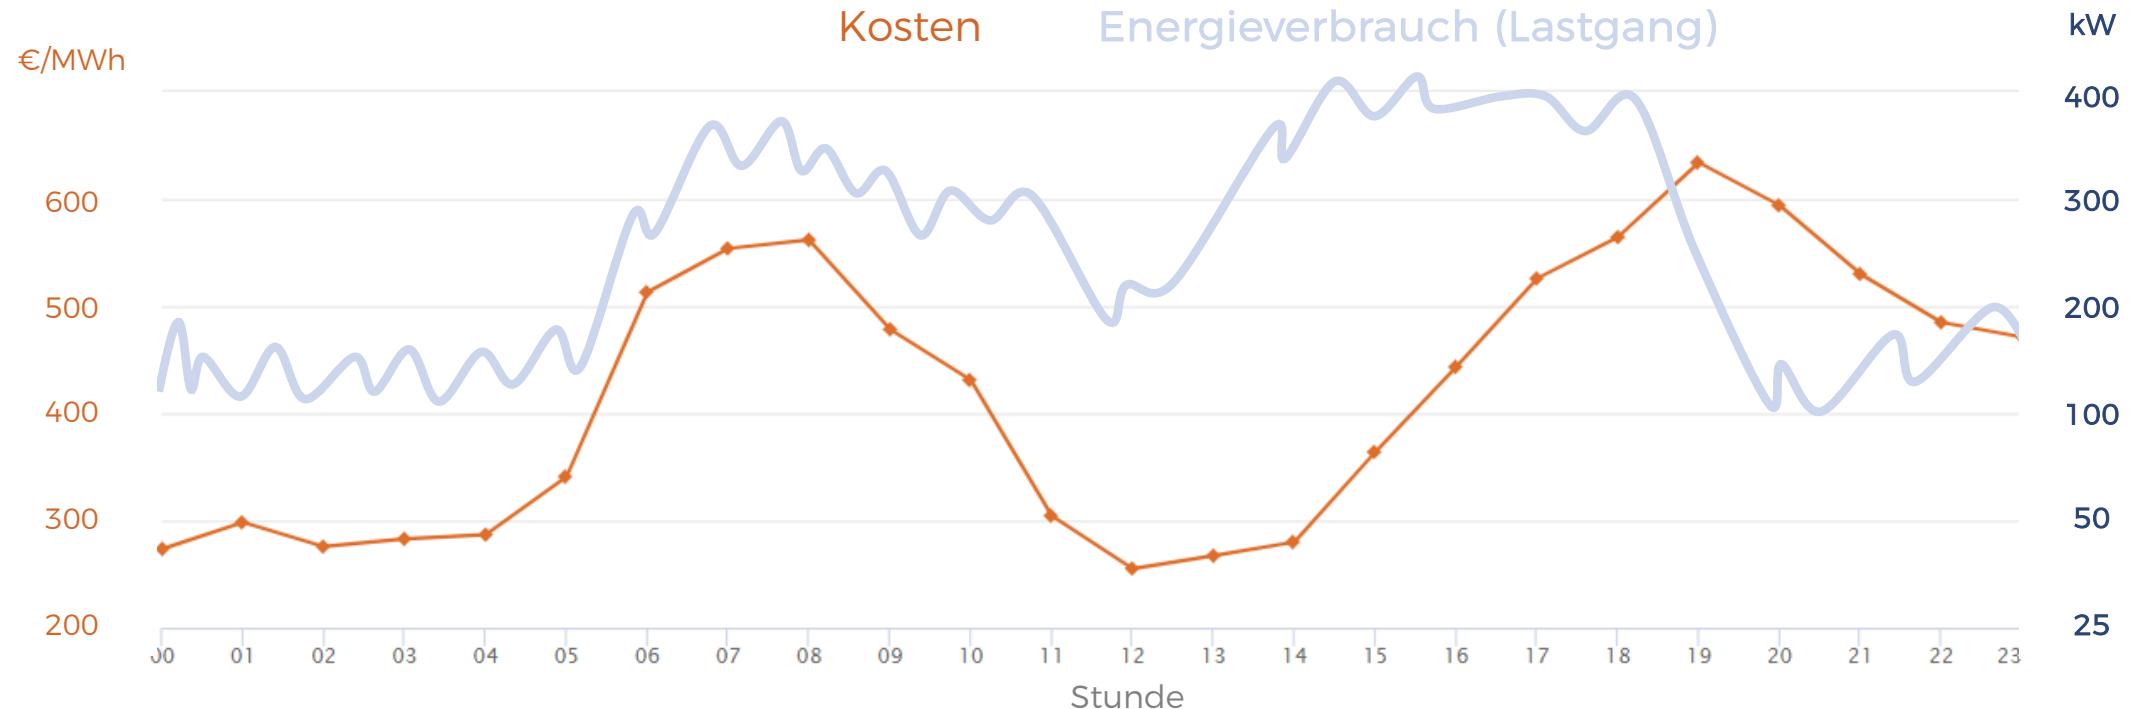

Wasserstoff-Speicher

Batterie-Speicher

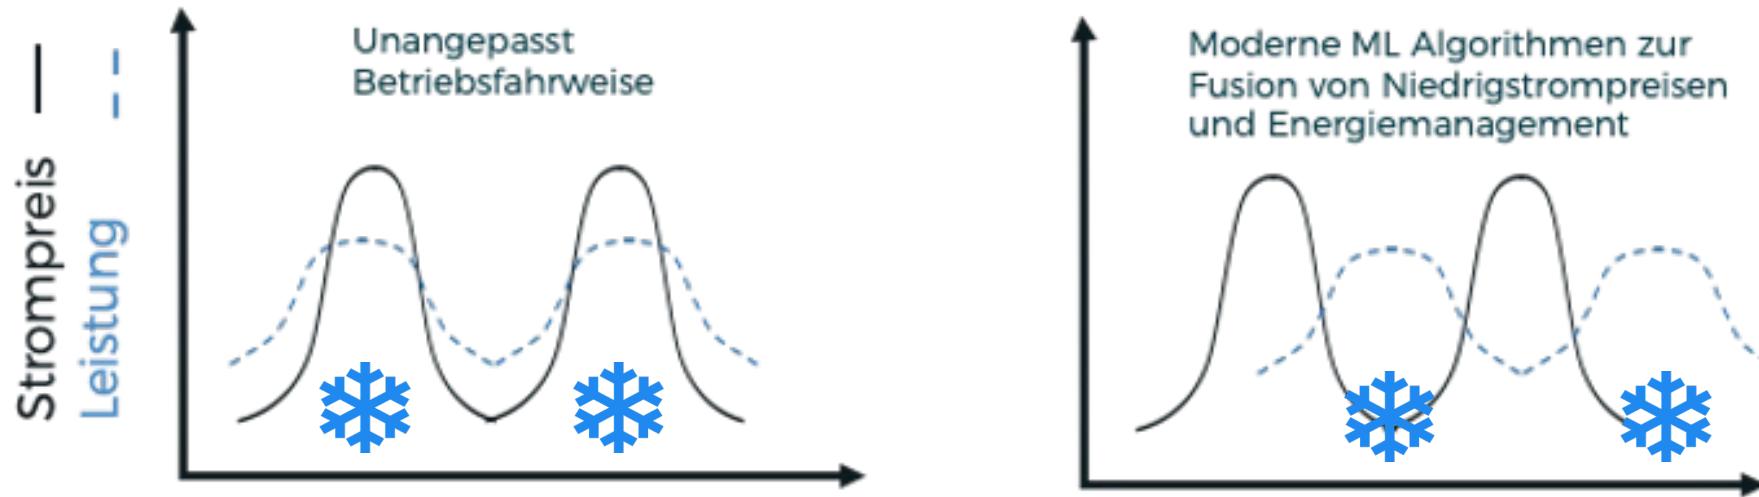

WIE IST DIE INDUSTRIE VON DEM STROMPREIS-SPREAD BETROFFEN?

# Der Energieverbrauch ist nicht kostenoptimal

WIE KANN MAN AUF TEURE SPEICHERSYSTEME VERZICHTEN?

# Die intelligente Lösung: Vorhandenes nutzen!

WIE GROSS IST DER STROMVERBRAUCH EINES TIEFKÜHLLAGERS

# Der Kühlschrank als Hauptverbraucher in RIESIG

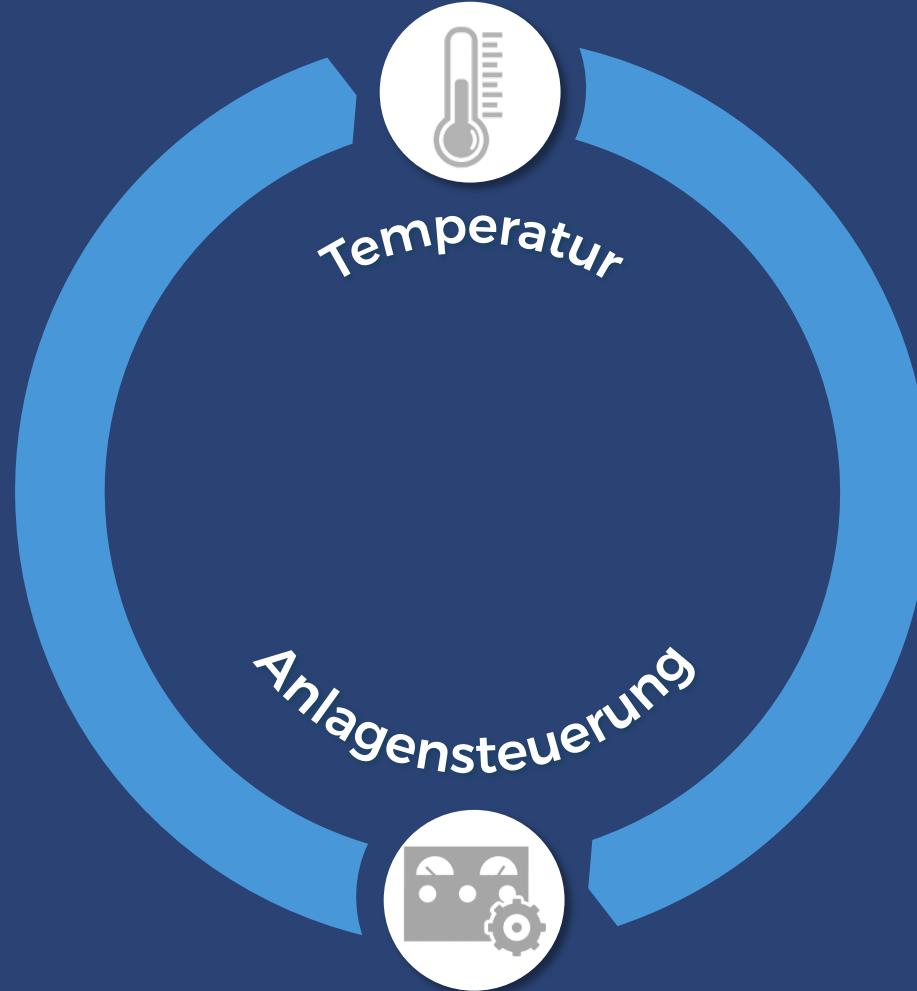

50.000 x =

1 bis 10 GWh p.a.

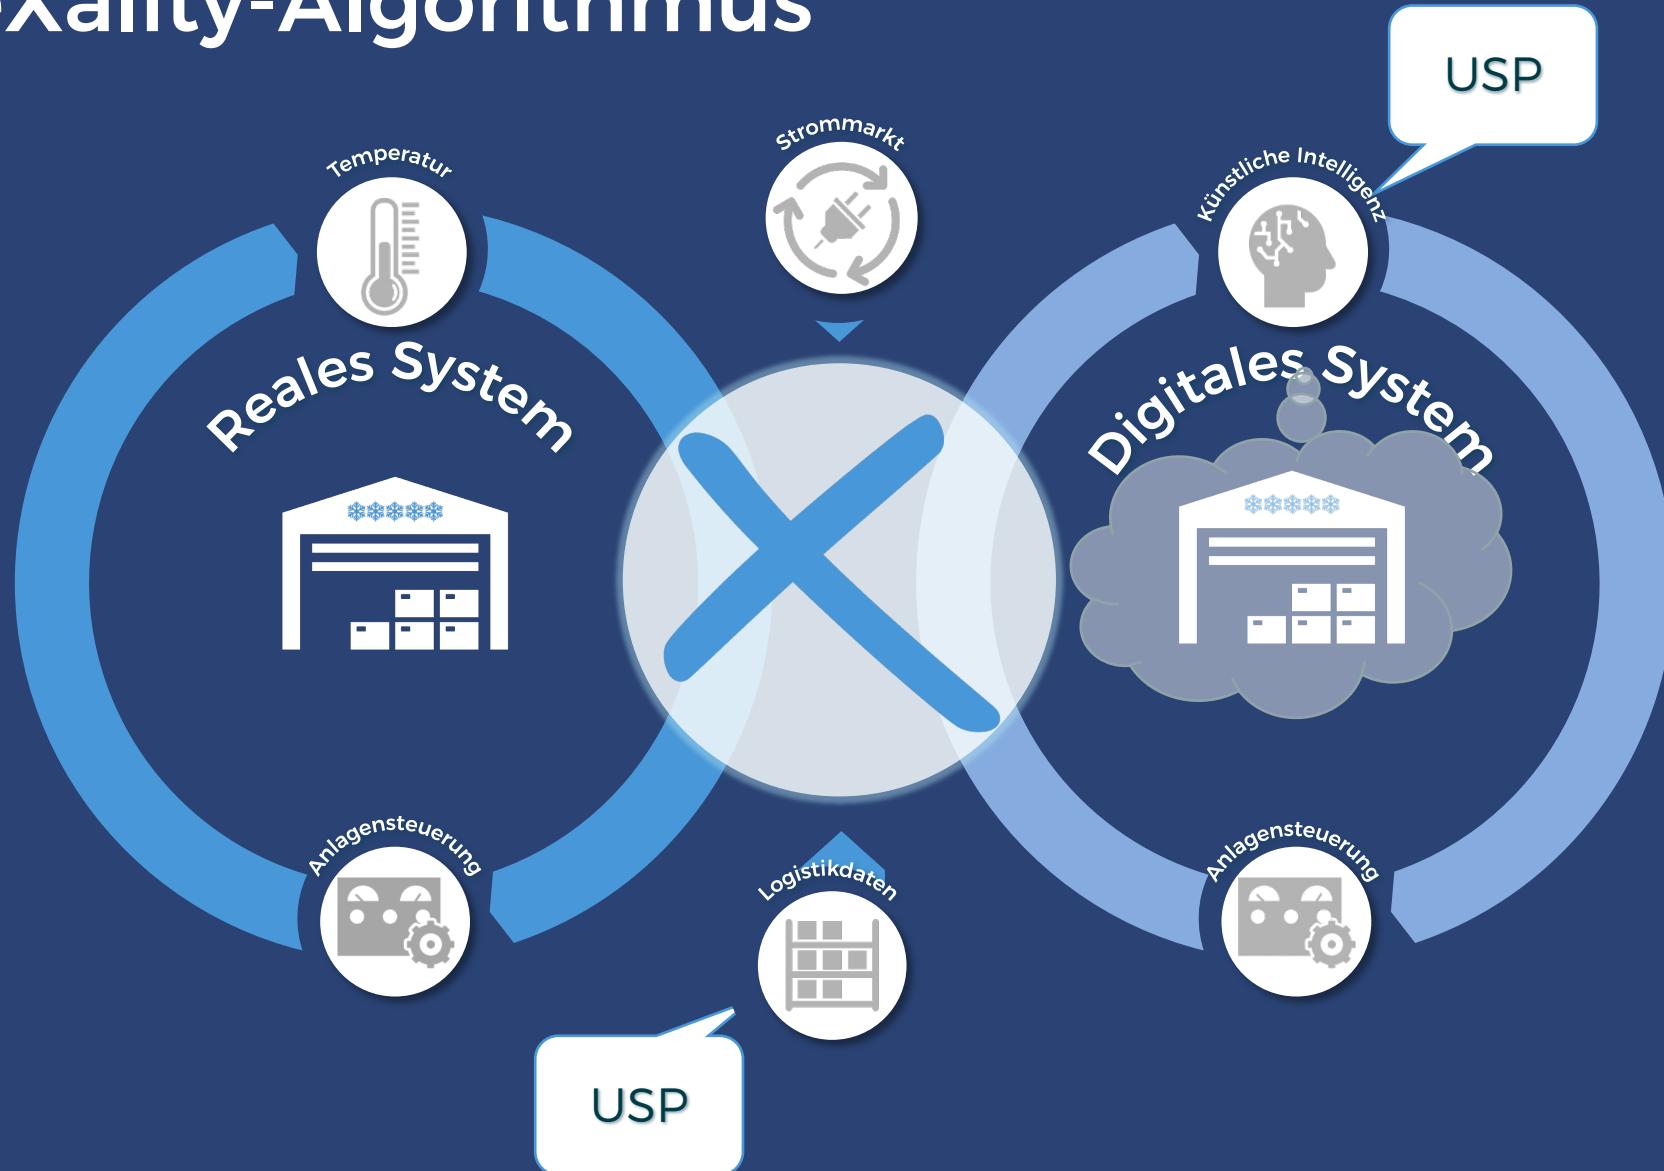

WIE SIEHT DER TYPISCHE BETRIEB EINER KÄLTEANLAGE AUS?

# Der einfacher Regelkreis eines Tiefkühllagers

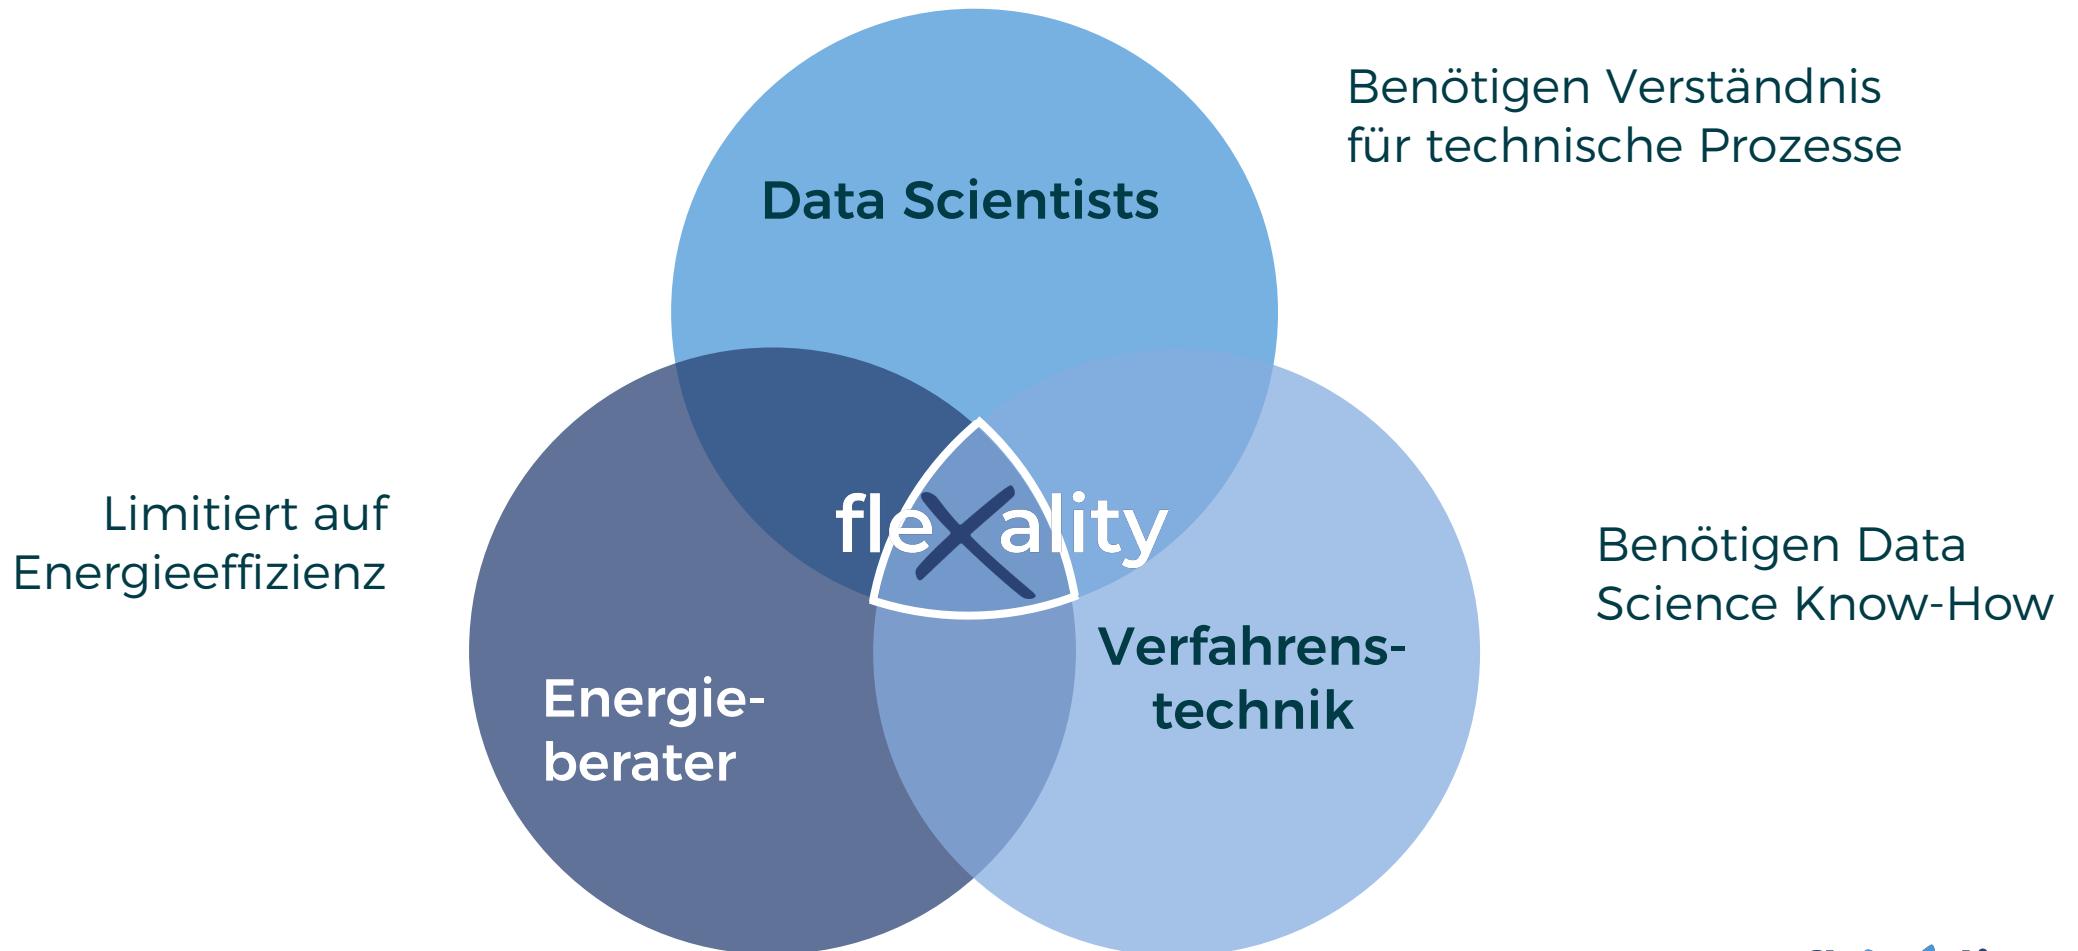

WAS MACHT UNSER PRODUKT BESONDERS?

# Der flexAlity-Algorithmus

WAS UNTERSCHIEDET UNS VOM WETTBEWERB?

# Unser Alleinstellungsmerkmal

MIT WELCHEN FINANZIELLEN UND ÖKOLOGISCHEN VORTEILEN KANN MAN KONKRET RECHNEN?

# Realistische Einspar-Potentiale in der Industrie

- 4,3 GWh/a Stromverbrauch
  - 23 Cent/kWh (Ø SpotPreis 2022)
  - 10 % Kosteneinsparungen
- 

**98.900 € Einsparungen p.a.**

**Keine Investition**

**Kein Risiko**

**3 Monate bis Projektstart**

WIE SIEHT UNSER UNTERNEHMENS-FAHRPLAN AUS?

# Von der Idee bis zum breiten Angebot in 4 Jahren

## 2020 IDEENFINDUNG

- Dyke schreibt seine Masterarbeit über Energieflexibilisierung mit Data Science bei dem größten TK-Lager Deutschlands
- Entwicklung des fleXality Prototypen

2021  

## TEAMAUFBAU

AI  
Leon

Business  
Development  
Dyke

Finanzen  
Sören

Coding  
Justus

## 2022∞ GRÜNDUNG

- Mentoren aus der Industrie
- Technologie-Partner
- Netzwerkaufbau
- Verbandsarbeit
- EXIST-Stipendium
- Erster Kunde

2023  

## FIRST MARKET

- Aufbau Cashflow
- Produkt-Validierung
- Strategische Partnerschaften
- Weitere Technologie-Partner
- 6 Neukunden
- 2 Angestellte
- Produkt-Rollout

## 2024 ff. SKALIERUNG

- Neu Produkte
- Neue Märkte
- Neue Industrien
- Neue Partner
- Teamausbau

# Nutzen für die Kunden

## ⬇ Stromkosten

Günstige Strompreise.  
Das Tiefkühl Lager wird zu  
einem riesigen Kälteakkumulator.

## ⬇ Emissionen

CO2-Austoß reduzieren  
So vereinbaren wir  
ökonomische mit  
ökologischen Interessen.

## ⬆ Flexibilität

Ausgleich von  
Stromschwankungen.  
Mehr erneuerbare  
Energien nutzbar.

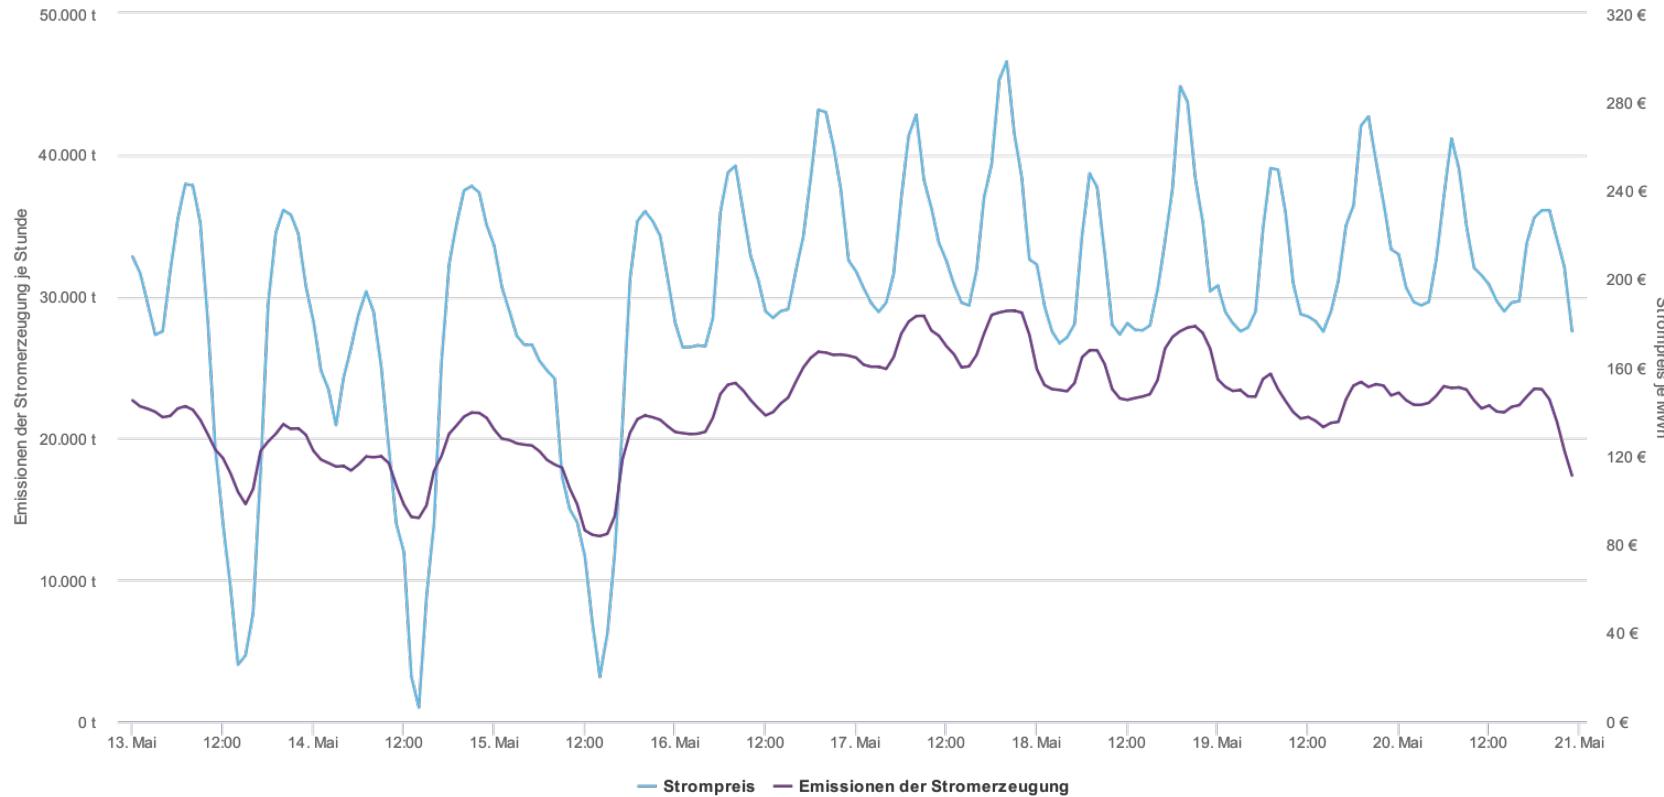

## ⬆ Vorreiterrolle

Wettbewerbsvorteil durch  
geringere Kosten und  
Emissionen

WARUM SIND FINANZIELLE UND ÖKOLOGISCHE VORTEILE VERBUNDEN?

# Die Korrelation von Strompreis und CO2-Anteil

Korrelation zw. Strompreis (blau) und CO2-Emissionen des Strommixes (violett) im Mai 2022

# Neustes Wissen gepaart mit >20 Jahren Erfahrung

# Summary

Approach	ESG Topics in Digitalisation			
Data Ecosystems		<b>Data &amp; AI for Sustainability</b> Using product & process data for positive Impact		Responsible AI
		<b>Sustainability Data</b> Corporate Data for ESG Reporting		Diversity, Equity & Inclusion
		<b>Green IT</b> Sustainable Infrastructure & Software		Data Security & Privacy

8.11.2023

# Breakout-Sessions

# Session 1: How to successfully run Data & AI projects for sustainability?

Government regulation will require suppliers to open up the data

Data used already, e.g. route optimization, not looked from a different point of view, i.e. sustainability

It's not only about what the customer wants but also what the responsibility of the company is

There might be a market shift for companies with a lot of suppliers

Internal data view traditionally quite good, but external view is missing

What other services can your services/products provide to collect sustainability data, e.g. trucks, animal count

Set the agenda how to make data sharing happen with your suppliers

When you open up your data, than you will jointly find new business models

Hit an organisation who's data you would be interested in and suggest do open up your data

Example: Amazon has a good understanding of their CO2 footprint

Start sharing and see who comes forward and shares with you.

There will be agents that work against you, e.g. fertilizer are not happy with digital and data tech, same with health apps, makes drugs more effective and you need less of them

# Session 2: Wie komme ich an meine ESG-Daten und wie transparent sollte man sein?

**Berechnungsansatz für Emissionen** anpassen an Höhe und Charakteristik der Footprint-Kategorien. Spend-based vs andere Berechnungsansätze

**Vereinfachung notwendig** bei komplexen Daten z.B. Scope 3.1: Bis zur Schmelze ist man schnell bei Tier 15/16!

Daten zu Investitionsgütern sind im Bereich B2C (z.B. Laptops) eher verfügbarer als bei speziellen B2B-Produkten (z.B. CNC-Maschine)

An tatsächliche Situation anpassen: Die Fahrzeugflotte bei einigen Firmen ist wesentlich, bei elobau gibt es nur wenige Fahrzeuge

**Lieferantenmanagement und Kooperation** – über externe Plattformen. Informationen zu Impact bei Kauf einer Komponente

Viele Fragen bei der **Datenqualität**: Soll man beispielsweise Durchschnittswerte auch an Kunden melden?

Wichtiges Ziel zurzeit ist **Bewusstsein schaffen** und den Umgang mit Daten lernen und schrittweise zu verbessern

**Verständnis für die Zahlen** schaffen: Schulungen für Mitarbeitende zu umwelt- und auch für finanzrelevante Kennzahlen

**Kommunikation und Ziele**: “Klimaneutralität”? Aktivitäten oder Endzustand in den Vordergrund stellen

Fokus auf **Reduzieren und Vermeiden**, aber Kompensation kann eine Rolle spielen. Wichtig ist Transparenz.

**Entscheidung für passende KPIs** für Monitoring und Reporting: Eigene Produktion vs. kompetter PCF

**Werkzeuge für PCF und Scope und Integration** dieser Werkzeuge mit bestehenden Datenplattformen

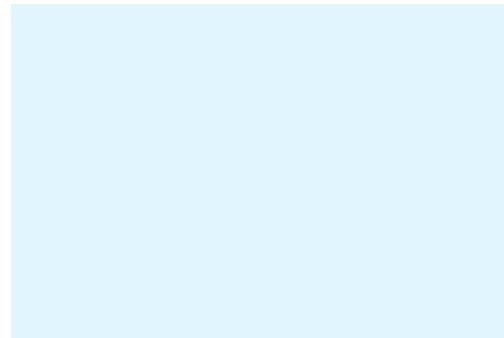

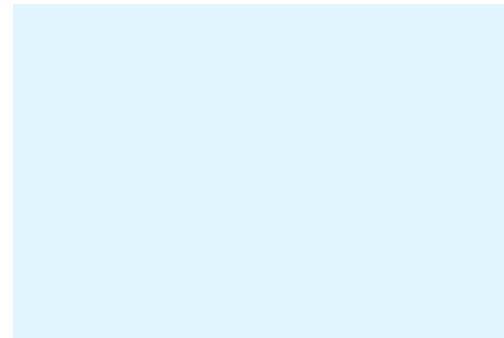

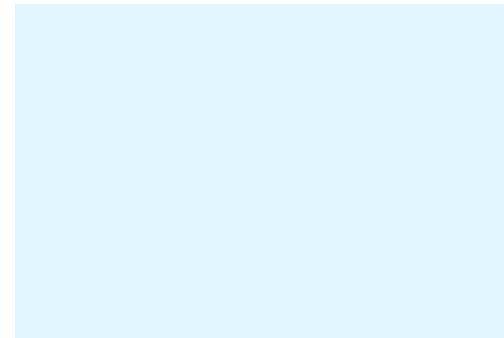

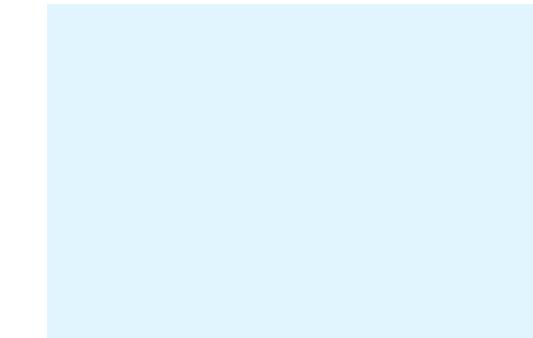

# Session 3: Energieflexibilisierung durch KI in Unternehmen

Bürkert (Ventile):  
unzureichende Daten um  
Potenziale einzuschätzen;  
Druckluft als teuerstes  
Produktionsmittel;  
teilautomatisierte Prozesse  
reduzieren  
Steuerungsmöglichkeiten

AXA CH:  
Reduzierung Footprint der IT  
(~25% des CO2 Footprint):  
Potenziale erheben; Cloud  
berücksichtigen;  
Abwärme nicht genutzt;  
Balanzieren von  
ökonomischen und  
ökologischen Zielen;  
Potenziale für neue Services &  
Features

Commerzbank:  
Fokus auf Finanzierung  
basierend auf ESG  
Kennzahlen;  
Erstellen eines Climate-Risk-  
Score

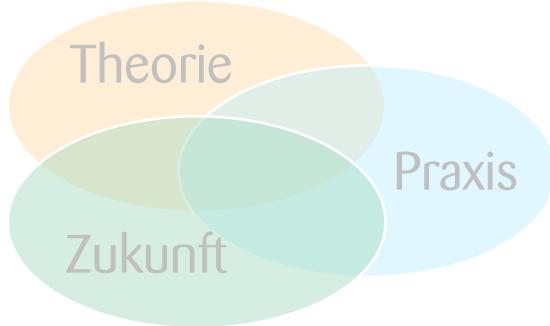

raumedic / Rehau:  
~25% Energielast geht in  
Reinraumbereitstellung  
(Potenzial für Flexibilisierung?)

# Breakout Sessions (35 Min.)

- Wir weisen Sie den Räumen entsprechend Ihren Wünschen zu
- Bitte schalten Sie Kamera & Mikro an (falls kein Hintergrundlärm da ist)
- Sie können den Raum mit [RETURN] oder [ZURÜCK] wieder verlassen
- Nach 35 Min. schließt der Raum automatisch

# Agenda (9-12 Uhr)

**Impuls (30 Min.)**

**Impuls (30 Min.)**

**Impuls (10 Min.)**

**Pause**

**Tiefe**

**Breite**

## **Breakout-Sessions:**

- 1. How to sucessfully run Data & AI projects for sustainability?**   
(with Dan, Zühlke and Martina)
- 2. Wie komme ich an meine ESG-Daten und wie transparent sollte man sein?**  
(mit Pascal, elobau, und Chris)
- 3. Wie lässt sich Energieflexibilisierung durch KI für Unternehmen nutzen?**  
(mit Dyke, Flexality, und Georg)

# Zusammenfassung der Breakout-Sessions & Panel-Diskussion

# Nächste Schritte

- Sie erhalten im Nachgang alle **Folien** per E-Mail.
- Melden Sie sich bei [Carolin.Casper@wilo.com](mailto:Carolin.Casper@wilo.com) wenn Sie sich zum Thema EPD & weltweites Recycling austauschen möchten.

## Unsere nächsten Events:

01.03.2022 Impuls-Talk „How to close the loop“ mit dem BMI Lab

22.03.2022 Roundtable „Product as a Service“ mit dem BMI Lab

# Vielen Dank für ihr Engagement!

**Wir freuen uns darauf mit Ihnen die besten Lösungen  
für Sie und unseren Planeten zu finden!**
